

JC17 Rec'd PCT/PTO 27 JUN 2005

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A drive device of work hydraulic cylinders, comprising:
 - a hydraulic source;
 - at least a plurality of work hydraulic cylinders of a single type, that are to be driven with pressure oil from the hydraulic source;
 - a control valve that controls a flow of pressure oil from the hydraulic source to the work hydraulic cylinders;
 - an operating ~~means for issuing~~ device that issues a command for drive of the control valve;
 - a selector switch that selects at least an independent operation of the work hydraulic cylinders; and
 - a pressure oil control ~~means for allowing~~ device that allows the pressure oil to flow to a work hydraulic cylinder selected with the selector switch and disallowing flow of pressure oil to other work hydraulic cylinders.
2. (Original) A drive device of work hydraulic cylinders according to claim 1, wherein:
 - the work hydraulic cylinders are outrigger cylinders mounted on a left side and a right side of a vehicle and the selector switch selects an independent operation of one of a left-side outrigger cylinder and a right-side outrigger cylinder or simultaneous operations of the left-side outrigger cylinder and the right-side outrigger cylinder.

3. (Original) A drive device of work hydraulic cylinders according to claim 2, wherein:

the work hydraulic cylinders are outrigger cylinders mounted also on a front side and a rear side of the vehicle, and the selector switch selects an independent operation of one of a front-side outrigger cylinder and a rear-side outrigger cylinder or simultaneous operations of the front-side outrigger cylinder and the rear-side outrigger cylinder.

4. (Currently Amended) A drive device of work hydraulic cylinders according to claim 2 ~~or claims 3~~, wherein

all the outrigger cylinders can beset in a non-operating state with the selector switch.

5. (Currently Amended) A drive device of work hydraulic cylinders according to ~~any of claims 1 through 4~~ claim 1, further comprising:

a switching ~~means for allowing~~ device that allows a selection of operations of the work hydraulic cylinders regardless of operations of the selector switch.

6. (Currently Amended) A drive device of work hydraulic cylinders according to ~~any one of claims 1 through 5~~ claim 1, further comprising: a display device at which an operation-enabled work hydraulic cylinder is indicated.

7. (Currently Amended) A drive device of work hydraulic cylinders, comprising:

a hydraulic source;

outrigger cylinders mounted at front and rear of a vehicle on a left side and a right side, that are to be driven with pressure oil from the hydraulic source;

a control valve that controls a flow of pressure oil from the hydraulic source to the outrigger cylinders;

an operating ~~means for issuing~~ device that issues a command for drive of the control valve;

a first selector switch that selects an independent operation of one of a left-side outrigger cylinder and a right-side outrigger cylinder or simultaneous operations of the left-side outrigger cylinder and the right-side outrigger cylinder;

a second selector switch that selects an independent operation of one of a front-side outrigger cylinder and a rear-side outrigger cylinder or simultaneous operations of the front- side outrigger cylinder and the rear-side outrigger cylinder; and

a pressure oil control ~~means for allowing~~ device that allows the pressure oil to flow to an outrigger cylinder selected with the first selector switch and the second selector switch and disallowing flow of the pressure oil to other outrigger cylinders.
